Intelli-Framer

Serving the Automated, Pre-Cut Industry for over 20 years.

HIGH PRODUCTIVITY SOLUTION FOR:

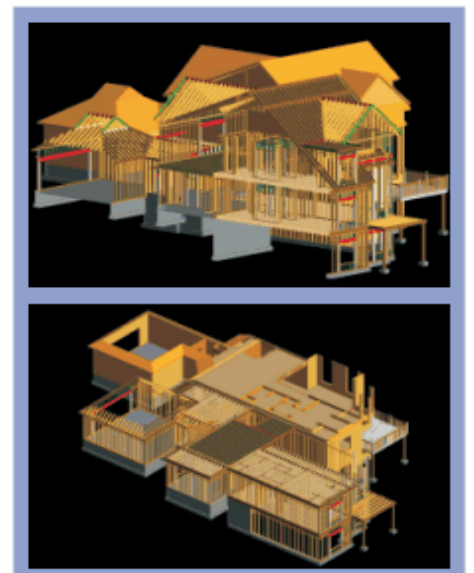

- > Design/Build
- > Panelizers
- > Modular Home Builders
- > Framing Contractors
- > Component Manufacturers
- > SIP Manufacturers
- > Lumber Suppliers

Intelli-Framer was made for you!

The Intelli-Framer + BuildersCAD bundle is designed to give you a **higher level of detail and accuracy** in CAD drawings, automated framing drawings, parts lists and material takeoffs. It allows you to generate rules-based framing drawings, automatic 3D models, cut list, pull list — everything you need for building framed construction. Intelli-Framer minimizes waste, speeds fabrication and saves you money.

Intelli-Framer Features

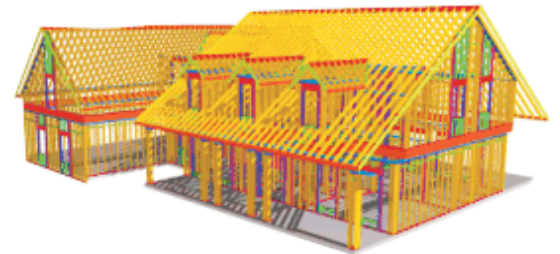

- > Automatic Panel Drawings
- > Optimized Framing Cut Lists
- > 3D Wall, Roof & Floor Framing
- > Automated Framing Layouts

Intelli-Framer

ROOF, WALL & FLOOR FRAMING

Framing

- Frame walls, roofs and floors based on your own customized framing rules.
- Automatically generate framing layouts.
- Automatically assigns key labels for every board and generates corresponding cutting lists.
- Easily edit properties of individual boards.
- Can use nominal, dimensional and engineered framing boards.

Panelizing Walls

- Customizable Header Matrix, allows you to specify different header rules for various opening sizes.
- Build your own library of custom framed openings and components.
- Create multiple framing rule sets for different projects.
- Automatically output elevation and bottom plate drawings.
- Easily output drawings as pdf or plot files.

Framing Takeoffs

- Every board is modeled – including exact depth and length.
- Framing output files are broken down by floor levels and are generated for wall, roof and floor boards.
- The Materials application utilizes these framing output files to enable you to run a range of Board Reports for wall boards, sorting the wall boards by use and/or by wall panel.
- Run a Pull List of the nominal lengths of lumber needed to frame the walls, roofs or floors. You can also run a Cutting Report that tells you how to cut the lumber.

WALL PANELS

PULL LISTS & CUTTING REPORTS

Intelli-Framer

Only
\$2995

Includes 1-Year of eZ (a \$399 value)
